Greater Bengaluru Area

Summary

Hello, I'm Naveen Maudgal, a dedicated DevOps Tech-Lead with extensive experience in optimizing cloud infrastructures, automating complex deployments, and driving efficient software delivery processes. With a robust background spanning over a decade in IT and Telecom, I specialize in building and enhancing Continuous Integration and Continuous Delivery (CI/CD) pipelines, leveraging cutting-edge technologies to create scalable, reliable, and cost-effective solutions.

I excel at converting manual tasks into streamlined automated workflows using tools like Terraform, Docker, Kubernetes, Jenkins, and Ansible. My aim is to boost organizational productivity by delivering high-quality, mission-critical software swiftly and accurately.

☁️# Cloud Platforms: AWS, Azure

Automation & IaC: Terraform, Ansible

CI/CD: Jenkins, ArgoCD

Containerization: Docker, Kubernetes

Monitoring & Logging: Prometheus, Grafana, CloudWatch

Version Control & SCM: Git, GitHub, AWS Code-Commit

Scripting & Automation: Shell Scripting, Task Automation, Python

Let's connect! Feel free to DM me here

Experience

Ericsson

7 years 1 month

Technical Lead

February 2022 - Present (4 years 4 months)

Bengaluru, Karnataka, India

- Successfully added Kubernetes clusters as runners to GitLab, enhancing scalability and build performance.
- Managed and maintained Kubernetes clusters, ensuring high availability and scalability for containerized applications. Implemented rolling updates and automatic scaling to accommodate increased workloads during peak usage periods.
- Conducted resource allocation and utilization analysis, leading to the optimization of container resource limits and requests. This resulted in a 15% reduction in infrastructure costs while maintaining optimal application performance.
- Implemented proactive monitoring and alerting using Prometheus and Grafana, reducing system downtime by 15%.

Senior Engineer

May 2019 - January 2022 (2 years 9 months)

Bengaluru, Karnataka, India

- Developed a custom Python script to automate routine system backups, enhancing disaster recovery capabilities.
- Provisioning AWS cloud infrastructure using Terraform and configuring them using Ansible.
- Experience setting multi region and multi cloud terraform projects and well versed using terraform workspaces.
- Led knowledge-sharing sessions on CI/CD and automation, empowering team members to take ownership of their workflows.
- Resolved critical production incidents promptly, maintaining system availability and minimizing business impact.
- Demonstrated excellent problem-solving skills by automating routine server maintenance tasks, freeing up valuable team resources for strategic projects.

Jio

Deputy Manager

April 2016 - April 2019 (3 years 1 month)

Navi Mumbai

- Involved with Designing team and implemented Jenkins-based CI/CD pipelines, automating end-to-end CI/CD processes, reducing deployment errors.
- Involved in migrating webapps from on-premises to AWS cloud using Lift and Shift.
- Learned AWS and managed different AWS cloud based services like EC2, S3, VPC and IAM.

- Worked as NHQ Circle owner for 5 circles and responsible for planning, optimization etc.

Ericsson

Engineer

December 2011 - April 2016 (4 years 5 months)

Noida Area, India

- Developed shell scripts for automating node health checks, monitoring CPU, memory, and other critical metrics, ensuring system stability.
- Recommending necessary parameter changes to overcome poor KPIs and basic health checkups of sites post implementation.
- Optimization of Top offender of LTE network (Accessibility, Retainability, throughput etc).

Education

West Bengal University of Technology

Bachelor of Technology (B.Tech.), Electronics and Communications

Engineering · (2007 - 2011)
